

ARCHITECTURAL SURFACES

CARE & MAINTENANCE

STAINLESS STEEL & FUSED METAL®

Fingerprints and smudges can be removed using a non-chlorinated spray cleaner/degreaser such as Simple Green® and a microfiber cloth. Do not use harsh abrasives, acids or chlorine-based cleaners or cleaning tools containing carbon steel, such as steel wool or wire brushes. Heavier soiling or superficial discoloration can be removed using a paste of baking soda on a damp sponge or Scotch-Brite™ light duty cleaning pad. Rub the surface gently and evenly and then rinse with fresh water. Dry with a soft cloth. Stainless steel's bright appearance can be maintained by occasional polishing with a soft cloth dipped in common household white vinegar. Commercial products specifically formulated for stainless steel such as 3M™ Stainless Steel Cleaner and Polish may also be used.

BONDED METAL® & BONDED QUARTZ™

Bonded Metal & Bonded Quartz require very little maintenance. Routine dust should be removed by periodic vacuuming or with a soft brush. Fingerprints, smudges and more persistent dirt can be removed by using an ammonia-free cleaner/degreaser such as Simple Green.

VIVIDGLASS™

VividGlass surfaces can be maintained using standard commercial, non-streaking cleaners and polishes formulated for use on glass.

WOOD VENEER

Veneer surfaces can be maintained using standard commercial cleaners and polishes formulated for use on interior woods.
